

Our Program

In its ever-evolving state, this is the 10th year of this teacher training program. The strength of this program is in the combination of group experiences and self-study.

Students learn through small and large group discussion, reading, journaling, demonstration, which is reinforced through application in the yoga classroom.

Each weekend, students build on the knowledge and experience gained in the sessions prior, in home practice, journaling and readings. Our instructors support the students in their personal journey as both a yoga practitioner and yoga teacher.

Join our faculty as they guide you through this transformational Yoga Alliance approved, Yoga Teacher Training experience. Attendance is required at all sessions for graduation. We understand that emergencies occur and options for make up hours will be given. We provide an intimate environment for growth and development.
